Munchkin has gone to the dogs . . . and foxes, mice, and ponies! Let your animal instincts take over as you explore the dungeon with your furry friends.

Munchkin Tails includes 168 cards, a custom six-sided die, and these rules. Three to six can play. You will need 10 tokens (coins, poker chips, doggie treats, whatever – or any gadget that counts to 10) for each player.

**Setup**

Divide the cards into the Door deck and the Treasure deck. Shuffle both decks. Deal four cards from each deck to each player.

**Card Management**

Keep separate face-up discard piles for the two decks. You may not look through the discards unless you play a card that allows you to! When a deck runs out, reshuffle its discards.

**In Play:** These are the cards on the table in front of you, showing your Race and Class (if any) and the Items you are carrying. Continuing Curses and some other cards also stay on the table after you play them. Cards in play are public information and must be visible to the other players.

**Starting and Finishing the Game**

Decide who goes first by any method you like. If you’re feeling uncreative, roll the die. High roller goes first.

Play proceeds in turns, each with several phases (see p. 2). When the first player finishes a turn, the player to the left takes a turn, and so on.

The first player to reach Level 10 wins . . . but you must reach Level 10 by killing a monster, unless a card specifically allows you to win another way.

**Turn Phases**

Your turn begins as soon as the previous player’s turn ends. When your cards are arranged the way you want, go to phase 1.

1. **Kick Down The Door:** Draw one card from the Door deck and turn it face up.
   
   If it’s a monster, you must fight it. See *Combat*, p. 3. If the card is a Curse – see *Curses*, p. 5 – it applies to you immediately (if it can) and is then discarded (unless it has a persistent effect or you keep the card as a reminder of an upcoming effect).

   If you draw any other card, you may either put it in your hand or play it immediately.

2. **Look For Trouble/Loot The Room:** If you fought a monster in phase 1, skip this phase and go to phase 3.

   *Conflicts Between Cards and Rules*

   This rulesheet gives the general rules. Many cards add special rules, so in most cases when the rulesheet disagrees with a card, follow the card. However, ignore any card effect that might seem to contradict one of the rules listed below unless the card *explicitly* says it supersedes that rule!

   1. Nothing can reduce a player below Level 1, although card effects might reduce a player’s or a monster’s combat strength (p. 3) below 1.
   2. You go up a level after combat only if you *kill* a monster.
   3. You cannot collect rewards for defeating a monster (e.g., Treasure, levels) in the middle of a combat. You must finish the light before gaining any rewards.
   4. You must *kill* a monster to reach Level 10, and you cannot force another player to help you do it.

   Any other disputes should be settled by loud arguments, with the owner of the game having the last word. You could also read the *Munchkin FAQ* and errata pages at munchkin.game, or start a discussion at forums.sjgames.com . . . unless it’s more fun to argue.
When You May Take Actions

You may perform these actions at any time:
- **Discard a Class or Race.**
- **Play a Go Up a Level.**
- **Play a Curse.**

You may perform these actions at any time, as long as you are not in combat:
- **Trade an Item with another player (the other player may not be in combat, either).**
- **Change which Items you have equipped.**
- **Play a card that you have just received (some cards may be played even during combat; see above).**

You may perform these actions on your own turn:
- **Play a new Class or Race card (at any time).**
- **Sell Items for levels (except when you are in combat).**
- **Play an Item (most Items cannot be played during combat, but some one-shot Items can; see p. 3).**

If you did NOT draw a monster when you first opened the door, you have two choices: either Look For Trouble or Loot The Room.

**Look For Trouble:** Play a monster **from your hand** and fight it, just as though you had found it when you kicked open the door. Don’t play a monster you can’t handle, unless you’re sure you can count on getting help (see p. 4).

**Loot The Room:** Draw a second card from the **Door deck**, face down, and place it in your hand.

(3) **Charity:** If you have more than five cards in your hand, you must play enough cards to get you to five or below – for instance, you can play Curses, sell Items from your hand, or play Items to the table. If you cannot reduce your hand to five cards, or do not want to, you must give the excess cards to the player with the lowest Level. If other players are tied for lowest, divide the cards as evenly as possible, but it’s up to you who gets the bigger set(s) of leftovers. If **YOU** are the lowest or tied for lowest, just discard the excess.

As soon as you are finished with Charity, the next player’s turn begins.

**Character Stats**

Each character is basically a collection of weapons, armor, and magic items, with three stats: Level, Race, and Class. For instance, you might describe your character as “a Level 8 Mouse Wizard with a Pet License, a Rolled-Up Newspaper, and the Itty-Bitty, Very Sharp Sword.”

**Level:** This is a measure of how generally buff and studly you are. When the rules or cards refer to your Level, capitalized, they mean this number.

You gain a level when you kill a monster, or when a card says that you do. You can also sell Items to buy levels (see **Items**, p. 3).

You lose a level when a card says you do. Your Level can never go below 1. However, your combat strength can be negative, if you get hit by a Curse or suffer some other kind of penalty.

**Combat: Basic Rules**

When you fight a monster, you compare your **combat strength** (your Level plus any bonuses or penalties) against the monster’s combat strength. If your combat strength is greater, you win! If it is tied or lower, the monster wins.

For the full explanation, see **Combat**, p. 3.

**Class:** Characters may be Warriors, Wizards, Thieves, or Clerics. If you have no Class card in front of you, you have no class. Yeah, I know, we did that one already.

Each Class has special abilities, shown on the cards. You gain the abilities of a Class the moment you play its card in front of you, and lose them as soon as you discard that card. Some Class abilities are powered by discards.

You may discard any card, in play or in your hand, to power a special ability.

See the Class cards for when abilities can be used.

Note that a Thief cannot steal while he or the target is fighting – and as soon as a monster is revealed, the fight is on!

You can discard a Class card at any time, even in combat: “I don’t wanna be a Wizard anymore.” When you discard a Class card, you become classless until you play another Class card.

You may not belong to more than one class at once unless you play the **Super Munchkin** card.

**Race:** Characters may be Humans, Dogs, Foxes, Mice, or Ponies. If you have no Race card in front of you, you are human and have no special abilities.

The rules for Classes, above, also apply to Races. You may not belong to more than one race at once unless you play the **Half-Breed** card.

**Super Munchkin and Half-Breed**

These cards may be played whenever it is legal to play a Class or Race, as long as you have an appropriate card (Class for **Super Munchkin**, Race for **Half-Breed**) to attach it to. You cannot have more than one of the same Class or Race card in play at once.

If you play **Super Munchkin** with a single Class, you get all the advantages of being that Class (the ability to equip Class-only Items, and monsters with penalties against that Class suffer those penalties) but none of the disadvantages (you may equip Items forbidden to that Class, and monsters do not get bonuses because of your Class). If the Class has an ability that has a cost, however, you must still pay it – you aren’t *that* Super!

If you play **Super Munchkin** while you have two Classes, you have all the normal advantages and disadvantages of both Classes.

All of the above is also true for **Half-Breed**, just for Races.

**Treasures**

Treasure cards can be permanent, specials, or one-shots. Any Treasure card may be played as soon as you get it, or at any time on your own turn except during combat (unless the rules below or the card itself says otherwise).
ITEMS

Most Treasures are Items. Items have a Gold Piece value. ("No Value" is equivalent to zero Gold Pieces, and a "No Value" card is considered an Item.) All Items you have in play are considered "carried." Items that are actually giving you a bonus are "equipped." You should indicate Items that are not equipped by turning the cards sideways. You may not alter the status of your Items during a combat or while running away.

Anyone can carry any Item, but you may equip only one Headgear, one suit of Armor, one pair of Footgear, and two "1 Hand" Items (or one "2 Hands" Item) … unless you have a card that lets you ignore these limits, such as Cheat!, or unless one of the cards says otherwise. If you are carrying two Headgear cards, for instance, you can equip only one of them at a time.

Likewise, some Items have restrictions: for instance, the Fox Forks can only be wielded by a Fox. Its bonus only counts for someone who is, at the moment, a Fox. (Hubba hubba.)

You cannot discard Item cards "just because." You may sell Items for a level, trade Items with other players, or give an Item to another player who wants it (see below). You may discard Items to power certain Class and Race abilities. And a Curse or a monster’s Bad Stuff (see p. 5) may force you to get rid of something!

Trading: You may trade Items (but no other cards) with other players. You may only trade Items from the table – not from your hand. You may trade at any time except when you or your trading partner are in combat – in fact, the best time to trade is when it’s not your turn. Any Item you receive in a trade must remain in play.

You may also give Items away without a trade, to bribe other players – "I’ll give you my Cone of Defiance if you won’t help Barb fight the Animal Control Enforcer!"

You may show your hand to others. Like we could stop you.

Selling Items for Levels: At any point during your turn except during combat or Running Away, you may discard Items worth a total of at least 1,000 Gold Pieces and immediately go up one level. ("No Value" cards are the same as zero Gold Pieces.) If you discard (for instance) 1,100 Gold Pieces worth, you don’t get change. But if you can manage 2,000 worth, you can go up two levels at once, and so on. You may sell Items from your hand as well as those you are carrying.

You may not sell Items to go to Level 10.

"ONE-SHOT" TREASURES

A Treasure card that says "Usable once only" is a One-Shot. Most of these are used during combat to strengthen the munchkins or the monsters, and may be played from your hand or from the table. Some have other effects, however, so read the card carefully! Discard these cards as soon as the combat is over or their effect is resolved.

One-Shots with a Gold Piece value may be sold for levels, just like other Items.

OTHER TREASURES

Other Treasure cards (like Go Up a Level cards) are not Items. Most of these cards say when they can be played, and whether they stay in play or are discarded. One example: Go Up a Level cards may be played on yourself or any other player at any time, even during combat. Discard them once they are played. You cannot play a Go Up a Level card to give a player the winning level.

COMBAT

To fight a monster, compare its combat strength to yours. Combat strength is the total of Level plus all modifiers – positive or negative – given by Items and other cards. If the monster’s combat strength is equal to yours, or greater, you lose the combat and must Run Away (see p. 5). If your combat strength totals more than the monster’s – note that monsters win ties! – you kill it and go up a level (two levels for some big monsters). You’ll also get the number of Treasures shown on its card.

Sometimes a card will let you get rid of the monster without killing it. This is still “winning,” but you don’t get a level. Unless the card says otherwise, you don’t get the Treasures, either. If the last monster is removed from a combat, the fight ends immediately.

Some monster cards have special powers that affect combat – a bonus against a particular Race or Class, for instance. Be sure to check these!

You and the other players may play one-shot Treasures or use Class or Race abilities to help or harm you in your combat. Some Door cards may also be played into a combat, such as monster enhancers (see below).

Remember: while you are in combat, you cannot sell, equip, unequip, or trade Items, or play Treasures from your hand, unless these rules or the card says otherwise.

If you kill a monster (or monsters!), discard the monster(s) and any other cards played, and claim your rewards. But note: someone may play a hostile card on you, or use a special power, just as you think you have won. When you kill a monster, you must wait a reasonable time for anyone else to speak up. After that, you have really killed the monster, and you really get the level(s) and Treasures, though they can still whine and argue.

MONSTERS

If drawn face-up, during the Kick Down The Door phase, monsters immediately attack the person who drew them.
If you get a monster card any other way, it goes into your hand and may be played during your own turn to Look For Trouble, or played with the Wandering Monster card to join another player’s fight. (See Fighting Multiple Monsters, below.)

Each monster card is a single monster, even if the name on the card is plural.

**MONSTER ENHANCERS**

Certain cards, called monster enhancers, raise or lower the combat strength of individual monsters. (Penalties to monsters are still considered enhancers.) They also affect the number of Treasures the monsters are worth. Monster enhancers may be played by any player during any combat.

All enhancers on a single monster add together. If there are multiple monsters in a combat, the person who plays each Enhancer must choose which monster it applies to.

*Exception:* Anything that enhances a monster also enhances its Mate. . . if Hungry, Rabid, and Mate are played on a single monster, in any order, you are facing a Hungry Rabid monster and its Hungry Rabid Mate. Good luck . . .

**Fighting Multiple Monsters**

Some cards (such as Wandering Monster) allow your rivals to send other monsters to join the fight. You must defeat their combined combat strengths. Any special abilities, such as forcing you to fight with your Level only, apply to the entire fight. If you have the right cards, you can eliminate one monster from the combat and fight the other(s) normally, but you cannot choose to fight one and Run Away from the other(s). If you eliminate one monster, but then run from the other(s), you don’t get any levels or Treasure!

**Asking For Help**

If you cannot win a combat on your own, you may ask any other player to help you. If he refuses, you may ask another player, and so on, until they all turn you down or someone helps. Only one player can help you, adding their combat strength to yours. Anyone can play cards to affect your combat, however!

You’ll probably have to bribe someone to help. You may offer your helper any Item(s) you are currently carrying, or any number of the Treasure cards the monster has. If you offer part of the monster’s Treasure, you must agree whether they pick first, or you pick first, or whatever. You may also offer to play any cards from your hand that you legally could, such as Go Up a Level cards, on your helper.

The special abilities or vulnerabilities of the monster also apply to your helper, and vice versa. For instance, if a Warrior helps you, you will win if your combined total ties that of the monster, and the Warrior can Berserk and discard cards to add to their combat strength (but only once per combat, not once per monster). If you are facing the Human Rights Activist and a Human helps you, they chase it away automatically. But if you are facing the Chihuahua and a Mouse helps you, the monster’s combat strength is increased by 4 (unless you, too, are a Mouse and the monster’s combat strength has already been increased).

If someone successfully helps you kill the monster, discard it, draw Treasures (see Rewards, below), and follow any special instructions on the monster card. You level up for each slain monster. Your helper does not go up any levels. You draw the Treasure cards, even if it was your helper’s special ability that defeated the monster, and distribute them according to the agreement you reached.

A few cards or abilities allow you to compel another player to help you in combat. These abilities do not work if you are fighting for the win – and if you force someone to help you and then the fight becomes one for the win, your helper gets to back out without penalty. However, if you voluntarily help someone, you don’t get to back out just because they’re about to win the game – so pay attention!

**Interfering With Combat**

You can interfere with others’ combats in several ways, including:

- **Use a One-Shot.** You could help another player by using a One-Shot to strengthen their side. Of course, you can “accidentally” strengthen the monster with it, instead . . .

- **Play a monster enhancer.** These cards (usually) make a monster stronger . . . and give it more Treasure. You can play these either during your own combats or during someone else’s combat.

- **Add a monster from your hand to join the combat, either with a Wandering Monster card or by using a special rule on the card.**

- **Backstab a player in combat, if you’re a Thief.**

- **Curse them, if you have a Curse card.**

**Rewards**

When you kill a monster, you get one level per monster, unless the monster card says something else . . . and you get its Treasure! Each monster has a Treasure number on the bottom of its card. Draw that many Treasures, modified by any monster enhancers played on it. Draw face down if you killed the monster alone. Draw face up, so the whole party can see what you got, if someone helped you.

If you defeat a monster by nonlethal means, you do not get a level and you may or may not get the Treasure, depending on the method.

Treasure cards can be played as soon as you get them, even if you are the helper.
Running Away

If nobody will help you . . . or if somebody tries to help, and your fellow party members interfere so the two of you still cannot win . . . you must Run Away. You don’t get any levels or Treasure. You don’t even get to Loot the Room. And you don’t always escape unharmed . . .

Roll the die. You escape on a 5 or more. Some Class and Race abilities and some Treasures might make it easier or harder to Run Away from all monsters. And some monsters give you a bonus or penalty to your roll for that monster only.

If you fail to Run Away from a monster, it does Bad Stuff to you, as described on its card. This may vary from losing an Item, to losing one or more levels, to Death (see below).

If you are fleeing from multiple monsters, you roll separately to escape each one, in any order you choose, and suffer Bad Stuff from each one that catches you as soon as it catches you.

Example of Combat, With Numbers and Everything

Chuck is a Level 4 Pony with the Saddle Shoes (which gives him a +3 to his combat strength). He kicks open the door and finds the Corral Snake, a Level 8 monster with an extra +3 against Ponies. Chuck’s at a 7, the Corral Snake is at 11, so Chuck is losing.

Chuck: I’ll distract it with my friend!

He plays the Tactical Plushie, giving him +5 for this fight.

Now his combat strength is 12, beating the Corral Snake’s 11.

Chuck: Not today, scaly varmint!

Mel: Don’t let him bite you!

Mel plays Rabid, adding 10 to the Corral Snake’s combat strength. Now Chuck is losing, 21 to 12.

Chuck: Thufferin’ thuccotash!

Mel: Want some help? (Mel is playing a Level 3 Dog with no Items at all, but he gets +4 when helping. Combined with Chuck’s 12 plus his own +3 when he gets a helper, they would have 22, just enough to defeat the Corral Snake’s 21)

Chuck: No, I’ve got a much more charming idea.

Chuck plays a Wizard card out of his hand and then discards the other three cards he’s holding to activate the Wizard’s Charm Spell. Since the Corral Snake was the only monster in the fight, the combat is over once it is charmed.

Mel: Fine with me. You won’t get a level and you don’t have any cards left.

Chuck: True, but look at all this Treasure!

Chuck draws four Treasures – two from the Corral Snake card, and two more because it was Rabid. And the game goes on . . .

Curses

If drawn face-up during the Kick Down The Door phase, Curse cards apply to the person who drew them.

If acquired some other way, such as by Looting The Room, Curse cards go into your hand and may be played on any player at any time. ANY time, do you hear me? Reducing someone’s abilities just as he thinks he’s killed a monster is a lot of fun.

Usually, a Curse affects its victim immediately (if it can) and is then discarded. However, some Curses give a penalty later in the game or have a continuing effect. Keep these cards until you get rid of the Curse or the penalty takes effect. (Curse cards you keep as a reminder may not be discarded to power Class or Race abilities. Nice try!)

Death

If you die, you lose all your stuff. You keep your Class(es), Race(s), and Level (and any Curses that were affecting you when you died) – your new character will look just like your old one. If you have Half-Breed or Super Munchkin, keep those as well.

Once you have died, you don’t have to Run Away from any remaining monsters.

Looting The Body: Lay out your hand beside the cards you had in play (making sure not to include the cards mentioned above). If you have an Item attached to a Chest! card, separate those cards. Starting with the player with the highest Level, everyone else chooses one card . . . in case of ties in Level, roll a die. Once everyone gets one card, discard the rest. If your corpse runs out of cards, tough. Looted cards go into players’ hands.

Dead characters cannot receive cards for any reason, not even Charity, and cannot level up or win the game.

When the next player begins their turn, your new character appears and can help others in combat with your Level and Class or Race abilities . . . but you have no cards, unless you receive Charity or gifts from other players.

On your next turn, start by drawing four face-down cards from each deck and playing any legal cards you want to, just as when you started the game. Then take your turn normally.
choose, and suffer Bad Stuff from monsters, you roll separately to Death harder to Run Away from all monsters. And If nobody will help you... or if somebody tries to help, and your fellow

Chuck draws four Treasures – two from the Corral Snake and the Tactical Plushie, giving him +5 for this fight.

Chuck is losing. He plays the Tactical Plushie, giving him +5 for this fight. The Corral Snake is at a 7, the Corral Snake is at extra +3 against Ponies. Chuck's at a 7, the Corral Snake is at

Chuck: Don't let him bite you!

Mel: True, but look at all this Treasure!

Mel: Thufferin' thuccotash!

Example of Combat,

If two players are cooperating and still can't defeat the monster(s), they

For a faster game, you can add a “phase 0” called Listen At The Door. At the start of your turn before doing anything else, draw a face-down Door card, which you may play or not. Then arrange cards and Kick Open The Door normally. If you Loot The Room, draw a face-down Treasure, not a Door.

You can also allow shared victories – if a player reaches Level 10 in a fight where you are the helper, you also win the game, no matter what Level you are.
